CSV File of Newly-Added Congressional Document Item Numbers

In response to requests from depository library staff for options in addition to the new item number information in WEBTEch Notes, a file of the new item numbers is now available in .csv format. This file is comprised of approximately 80 new item numbers for various Congressional publications.

New item number information can now be found in both **WEBTech Notes** and in **.csv format**. It should be noted that all are new, but several are not in the Y 4 class.

The .csv file is provided as an additional option to assist libraries in the evaluation and selection of the new item numbers before the extended annual update selection cycle deadline of August 12, 2011.
